# Graza 88

## FORAGE OATS

### KEY FEATURES

- |   |  |
|---|--|
| ✓ Graza 88 is a highly productive multi-purpose forage/hay oat, widely adapted to most soil types | ✓ Good early vigour and fast recovery after cutting or grazing   |
| ✓ A finer stem and finer leaf with very even tillers makes it ideal for high quality hay          | ✓ Ideal in dryland regions from 400mm plus, through to irrigation  |
| ✓ Highly palatable for grazing  | ✓ Graza 88 has produced excellent results for hay producers and graziers over similar maturity varieties |
| ✓ Good disease package  |  |

### PERFORMANCE

Graza 88 is a high tillering oat suited to most soil types. This multi-purpose variety can produce high dry matter production after second and third grazings. Graza 88 is an ideal hay or grazing oat.

### AGRONOMY, DISEASE RESISTANCE AND TOLERANCE

Graza 88 has demonstrated a high level of resistance to the known rust strains in a wide array of commercial dryland and irrigated situations.

### MATURITY

A late maturing variety, Graza 88 will fit into any farming program as an ideal companion to Graza 53 or Graza 85.

### SEED AVAILABILITY

Available through all national rural resellers.

**Your local agronomist will be happy to assist you with more information and advice.**
